A Division of MUM Industries

WHY INTEGRA?

Manufactured, Assembled and Stocked in the USA.

Integra Enclosures manufactures engineered polycarbonate and stainless steel enclosures designed for use in electrical construction, water treatment, car wash, telecommunication, instrumentation, utility, machine building, HVAC, or any other applications requiring quality industrial enclosures.

Our superior design and high quality materials provide enclosures that look great, seal tight, and stand up to tough environments.

Integra maintains an extensive, on hand inventory to support your delivery.

Call us at 440.269.4966 or visit www.IntegraEnclosures.com to learn more.

POLYCARBONATE

Polycarbonate is widely superior compared to other enclosure materials because of its high tensile strength and prolonged durability. It is strong like steel yet cuts like butter, making it easier for users to install and modify enclosures in the field. Polycarbonate maintains its durability and will not break down or fade in sunlight.

UV Protection

Impact Resistance

Ease of Modification

STAINLESS STEEL

Stainless steel enclosures deliver unparalleled durability and reliability for the most challenging environments.

Integra's stainless steel enclosures are NEMA 4X or 3SX rated and can be modified to any size, latching and machining requirements.

Heat Dissipation

Chameleon Effect

Corrosion Resistant

PREMIUM LINE

★ MOST VERSATILE OPTIONS

LATCHES

- Stainless Steel Locking Latch
- Non-Metallic Locking Latch

HINGES

- EZ Hinge
- Screw Cover

COVERS

- Opaque
- Clear

- Unique T-Rail mounting system to completely adjust panels and face plates
- Includes enclosure foot mount or flange mount system
- Brass bosses for easy panel installation
- Wide range of options and accessories to meet any application

IMPACT LINE

★ FREQUENCY FRIENDLY

LATCHES

- Stainless Steel Locking Latch
- Non-Metallic Locking Latch
- Integrated Latch

HINGES

- EZ Hinge
- Low Profile Hinge

COVERS

- Opaque
- Clear

- Integrated mounting flanges
- Advanced interior mounting system for circuit boards, face plates, swing panels, etc.
- Multiple molded-in bosses to secure components
- Ideal for remote monitoring and wi-fi applications

GENESIS LINE

★ LARGEST SIZES

LATCHES

- Three-Point Latch
- Quarter-Turn Latch
- Non-Metallic Locking Latch

HINGES

- Continuous Piano Hinge

COVERS

- Opaque
- Clear

- MULTI-MAX frame ring provides unmatched strength and rigidity
- Optional swing panel includes full piano hinge to add additional strength
- Great for battery storage and car wash applications

STAINLESS STEEL

YOUR PARTNER IN CUSTOM METAL ENCLOSURES

- UL 508A NEMA 4X or 3SX Rated
- Chemical, corrosion, and hose-down resistant
- Multiple latch, mounting and hinge design options
- Custom sizing up to 90" in height
- Capabilities of multiple doors
- Foam-In-Place gasket and #4 grade brush finish
- Well suited for large quantity projects and OEMs

CUSTOM ENCLOSURE OPTIONS

LATCHES

- Quarter-Turn Latch
- Pad Lockable 3-Point Latch
- Locking Hasp Latch
- Contact for more options

HINGES

- Removable Pingue™
- Continuous Piano Hinge
- Lift-Off Hinge

MOUNTING

- Welded or Bolted Mounting Tabs
- Welded or Bolted Mounting Flange
- Rivet Nuts or Through Holes
- Multiple Sizes of Legs

ADD-ONS

- Panels (can be modified)
- Windows
- EMI/RFI Shielding
- Gland Plates
- Solar Shields

STANDARD

Standard wall mount or floor mount enclosures can have up to 5 doors and feature Integra's wide-faced return flange for a reliable seal.

SLOPE TOP

The angled roof on our slope top enclosures help ensure a weather resistant design by not allowing water and debris to collect on top of the enclosure. Choose between full-faced or bull-nose design.

COMPLETELY YOURS

Customize your entire enclosure to meet your specific needs.

CUSTOMIZATIONS

OUR PRODUCT, THE WAY YOU LIKE IT

MACHINING & MODIFICATIONS

POLYCARBONATE

- Drilled Hole Patterns
- CNC Machine Cutouts
- Mounting Options
- Latching Options
- Various Accessories Available

STAINLESS STEEL

- Laser Cut Machining
- Mounting Options
- Latching Options
- Hinge Options
- Custom Back and Swing Panels
- Various Accessories Available

COLOR & POWDER COAT

MOLDED COLOR POLYCARBONATE

- Match your company's color and logo
- Blend into the environment
- UL Rated*
- 100-piece minimum

*Contact factory for details

POWDER COATED STAINLESS STEEL

- Range of RAL colors to choose from
- Additional layer of protection
- Blend into the environment
- UV resistant

CUSTOMIZATIONS

AVAILABLE ON ANY SIZE ENCLOSURE

PRINTING & ENGRAVING

- Full-color, High-Quality UV Cured Ink available in 16.7 Million Colors
- Weatherproof, UV, Chemical, and Scratch Resistant options for any application

POLYCARBONATE

- **Laser** Burns a durable, gray scale image into the plastic. Great for simple graphics and text.
- **UV Printing** uses a “liquid plastic” that acts like ink to create a raised image from an array of unlimited colors. This highly durable print is UV cured and resistant.
- **Overlays** are the easiest to manipulate and the most cost-effective color option. They can be opaque or transparent and applied to the inside or outside of the cover.
- **Silk-Screening** prints a high-quality image by layering colors on top of each other. This longer process is worth the price as it is considered our best-looking print.

STAINLESS STEEL

- **Engraving** uses a laser to inscribe into the metal. Images can be solid, outlined, or have an alternate fill in gray scale shades.
- **Silk-Screening** creates sharp, full color images with optional UV protective coating for outdoor use.

For a custom printing quote, please send the following to customerservice@integraenclosures.com

- High quality .AI art file of the exact graphic to be printed
- Drawing or detailed description of location and size of art
