*Pick Hose Clamp based on pole size

## Mounting Bosses Installation:

**1.** Attach the Hose Clamp Bracket to the inside of the Strut Rail. Use the 1/2" Pan Head Screw, Fender Washer, and Nylok Nut to secure.
Note: Torque to 32 in-lbs Max.

**2.** Attach rails to enclosure by placing washer over mounting bosses and secure with 1/2" Pan Head Screw.
Note: Torque to 32 in-lbs Max.

**3.** Feed Hose Clamp through slots of the Bracket. Wrap Hose Clamp around pole and tighten.

Ⓐ    Ⓑ

## Mounting Flange Installation:

**1.** Attach the Hose Clamp Bracket to the inside of the Strut Rail. Use the 1/2" Pan Head Screw, Fender Washer, and Nylok Nut to secure.
Note: Torque to 32 in-lbs Max.

**2.** Insert 7/8" Pan Head Screw through mounting flange hole. Align with Fender Washer and Spacer on opposite side. Attach Strut Rail using Fender Washer and Nylok Nut to secure. Note: Torque to 32 in-lbs Max.
